

~ Aerospace Engineering - Bachelor of Science Curriculum ~

Although this is a **suggested** outline, **all** courses listed below are **REQUIRED** for this degree. Refer to the [Undergraduate Catalog](#) for verification.
In the event of conflicting information, the Degree Audit and UF Catalog supersede any information provided on this sheet.

Critical tracking courses: MAC 2311, MAC 2312, MAC 2313, MAP 2302, PHY 2048, PHY 2049, CHM 2045 & EML 2023 must be completed by semester 5, not including summer terms. A 2.8 GPA is required for these 8 courses. A "C" or better must be earned in each course. Students have 2 attempts at each course, including drops.

Courses highlighted below and listed with an **asterisk (*)** – (critical tracking course) or **pound (#)** – (MAE Core) **require a grade of C or better**. All others require a D minus or better (i.e. a passing grade). Critical tracking must be completed within 2 attempts. All other classes have no limit on attempts.

Every line below must be satisfied independently. One course cannot be used for two lines; for instance, a course **cannot** count as a technical elective **AND** a science elective simultaneously.

Students must complete general education **international** and **diversity** requirements. This is often done while completing another general education requirement, typically humanities or social and behavioral sciences.

Students must complete unique **State Core** general education requirements. Refer to your [Degree Audit](#) or the [UF Catalog](#) for the lists of acceptable courses.
