Office Hours in 324 MAE-A : M,T,F (0935-1025) and Th (1500-1550)

Course Description

(3 credits) Theory, analysis and design of control system, including mechanical, electromechanical, hydraulic, pneumatic and thermal components and systems.

Pre-requisites and Co-requisites

EGM 3401 and MAP 2302

Course Objectives

This course will demonstrate the principles used to control the behavior of dynamical systems. Students will learn how to represent dynamics using both time-domain concepts and frequency-domain concepts. Similarly, aspects of system behavior will be characterized using metrics such as rise time and steady-state error. Most importantly, techniques to use sensor measurements in feedback will be introduced to change those behaviors.

Materials and Supply Fees

none

Relation to Program Outcomes (ABET)

	Outcome	Coverage
(1)	an ability to identify, formulate, and solve complex engineering problems by applying princi-	HIGH
	ples of engineering, science, and mathematics	
(2)	an ability to apply engineering design to produce solutions that meet specified needs with	LOW
	consideration of public health, safety, and welfare, as well as global, cultural, social, environ-	
	mental, and economic factors	
(3)	an ability to communicate effectively with a range of audiences	LOW
(4)	an ability to recognize ethical and professional responsibilities in engineering situations and	
	make informed judgments, which must consider the impact of engineering solutions in global,	
	economic, environmental, and societal contexts	
(5)	an ability to function effectively on a team whose members together provide leadership, create	
	a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives	
(6)	an ability to develop and conduct appropriate experimentation, analyze and interpret data,	MEDIUM
	and use engineering judgment to draw conclusions	
(7)	an ability to acquire and apply new knowledge as needed, using appropriate learning strategies	LOW

Required Textbooks and Software

- Katsuhiko Ogata, "Modern Control Engineering", Prentice-Hall, 2010, ISBN 978-0-13-615673-4
- Some assignments will require the use of MATLAB.

Recommended Material

none

Course Schedule

The course will essentially consist of 3 sections. The first section will utilize the Laplace transform to generate models that represent dynamics and note their behavior across frequencies. The second section will describe the use of feedback and introduce a method to design controllers to modify the dynamics of a system. The third section will introduce additional aspects of feedback that expand the range of achievable behaviors for the dynamics of a system.

Attendance Policy, Class Expections and Make-Up Policy

- Students are expected to attend every lecture. Aspects of of exams and homeworks are constructed based on content and concepts presented in these lectures so you will not be properly prepared if you do not attend class. The lectures and recommended textbooks are meant to present complementary approaches and examples so the textbooks are supplementary to, but not replacements for, the lectures. Also, some lectures may have unannounced in-class quizzes which do not have make-up options.
- Students may request to re-schedule an exam for academic/professional reasons (conference,interview,...) as long as the request is submitted at least 2 weeks before the exam. The student will take an exam, which will be different from the rest of the class, before their absent date.
- Homework must be submitted by the start of class. No late homeworks will be accepted.
- Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies at https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies

Evaluation of Grades

tentative date	event	course value
	EXAMS	65%
February 03	exam01	(15%)
March 08	exam02	(25%)
April 14	exam03	(25%)
	HOMEWORK	20%
February 01	homework01	(4%)
March 06	homework02	(8%)
April 10	homework03	(8%)
	PROJECT	15%
April 24	project	(15%)

Grading Policy

Grades will be determined based on a curve that reflects the level of difficulty for each homework and exam. This curve is not based on class performance or the student average; instead, the curve is determined before the exam is given based on the amount of partial credit allowed for each solution. In this way, there is not any pre-determined grade distribution which means everyone is able to get an A.

Grade Evaluation

Any exam for which a student wants the grade to be evaluated must be given to the instructor within 48 hours, and before the start of the subsequent lecture, of when the graded exams were available to the class.

Students Requiring Accommodations

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the disability Resource Center by visiting https://disability.ufl.edu/students/get-started/. It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

Course Evaluation

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at https://gatorevals.aa.ufl.edu/students. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

In-Class Recording

Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A "class lecture" is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To "publish" means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Honor Code and Student Conduct Code.

University Honesty Policy

UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code". On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code (https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

Commitment to a Safe and Inclusive Learning Environment The Herbert Wertheim College of Engineering values broad diversity within our community and is committed to individual and group empowerment, inclusion, and the elimination of discrimination. It is expected that every person in this class will treat one another with dignity and respect regardless of gender, sexuality, disability, age, socioeconomic status, ethnicity, race, and culture.

If you feel like your performance in class is being impacted by discrimination or harassment of any kind, please contact your instructor or any of the following:

- Your academic advisor or Graduate Program Coordinator
- Robin Bielling, Director of Human Resources, 352-392-0903, rbielling@eng.ufl.edu
- Curtis Taylor, Associate Dean of Student Affairs, 352-392-2177, taylor@eng.ufl.edu
- Toshikazu Nishida, Associate Dean of Academic Affairs, 352-392-0943, nishida@eng.ufl.edu

Software Use All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

Student Privacy There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see: http://registrar.ufl.edu/catalog0910/policies/regulat

Campus Resources

- Health and Wellness
 - U Matter, We Care: Your well-being is important to the University of Florida. The U Matter, We Care initiative is committed to creating a culture of care on our campus by encouraging members of our community to look out for one another and to reach out for help if a member of our community is in need. If you or a friend is in distress, please contact umatter@ufl.edu so that the U Matter, We Care Team can reach out to the student in distress. A nighttime and weekend crisis counselor is available by phone at 352-392-1575. The U Matter, We Care Team can help connect students to the many other helping resources available including, but not limited to, Victim Advocates, Housing staff, and the Counseling and Wellness Center. Please remember that asking for help is a sign of strength. In case of emergency, call 9-1-1.
 - Counseling and Wellness Center: http://www.counseling.ufl.edu/cwc, and 392-1575; and the University Police Department: 392-1111 or 9-1-1 for emergencies.
 - Sexual Assault Recovery Services (SARS): Student Health Care Center, 392-1161.
 - University Police Department: at 392-1111 (or 9-1-1 for emergencies), or http://www.police.ufl.edu/.
